

Process for onboarding of OEM's on mines portal

Dear OEM,

The attached minimum details are required from the Vendor/OEM for onboarding into the VTS application. Based on the submitted information, a Login ID and Password will be created and shared with the vendor for device registration, vehicle-device mapping, and fitment activities on track.rajvts.com:7001. All devices must be configured and integrated as per the approved SOP and NIC packet structure requirements.

Post Onboarding Process

1. Vendor submits the above details.
2. Application/CSM team verifies the information.
3. Login credentials are created and shared to respective OEM/VENDOR.
4. Vendor configures devices to send data to track.rajvts.com:7001 as per NIC packet structure/SOP.
5. Vendor registers devices in the portal.
6. Device fitment and vehicle mapping activities are performed.

Document for basic detail required from vendor to create login and start fitment.

Sheet 1: Vendor Master Registration
